

FIRST MEETING OF THE PROJECT IN ESTONIA. From the 23rd to the 27th of January, took place, in Estonia, the first meeting of the project “Fresh Water”, with the participation of five countries: Lithuania, France, Estonia, Turkey and Spain. The experience has been very positive, because we have learnt a lot about water and not only this, but also we have seen that it is not so difficult the understanding between people from different countries.

The first day, the 24th January, we’ve visited a treatment plant of water in Tallinn, where a man explained us how they purify the water of the country.

Visit to the treatment plant of water

After lunch, we’ve visited Tallinn, the capital of Estonia. It was very cold because it was snowing but it is a very nice city.

In the afternoon, we went to Parnu-Jaagupi, a village near Parnu that is 100 kms far from Tallinn (2 hours by bus). We met our families and went home with them. We were a little bit nervous but they were very kind and we felt as if we were at our home!.

Traditional dances

On Friday 25th, they’ve prepared a lot of activities related to water and in the night we had a “National evening” in which teachers and students made a short presentation of their countries. The Estonian students danced traditional dances for us and then we tasted typical food of the area.

Typical food

The 4th day, we’ve visited the city of Pärnu and its frozen beach and then, we went to a very beautiful National Park to visit some bogs. Teachers carried with them some sweets, coffee and tea for us to eat after going up to the top of the Tower (a marvellous view!!)

Excursion to the National Park to visit the Bogs

Finally we had, all together, the farewell lunch. After lunch, Mathias and Marion, from France, played the guitar and sang some famous songs (Clandestino,...) to invite us to sing with them. This created a very good atmosphere. We were sad for having to say goodbye and on the other side, we had a feeling of joy, by the good moments lived. It has been a very good experience that allowed us to grow up not only in knowledge but also in values. The organization of the meeting and the attitude of Estonian people have been exemplary, and we hope to receive them in the same way when they come to Madrid for the second meeting. Thank you for this opportunity!!

Aida Fernández and Roxana Nodis. Students from the IES Joaquín Araújo. Madrid
